

Emmanuel Wafo

Emmanuel WAFO FOKO, CEO of MIT CHIMIE is the founder of the group which started as a simple establishment in 1998 with an office of 20 m² and one employee to a very small company with 10 employees a few years later. 25 years later the Group of companies specialized in plastic processing based in Douala is built on an area of 1 hectare. And MIT AFRICA the company of the group specialized in logistics and whose site is located in the port area of Douala occupies an area of 5,000 m².

During the period 2010-2015, he decided to invest massively, several billion FCFA, by creating an industry equipped with latest generation machines that allows MIT CHIMIE to locally produce products such as:

- PET preforms (by injection) that allow other industries to have high quality containers meeting ISO 9001 and 22000 standards;
- Plastic sheaths and films;
- "PET" bottles for the food and soft drinks production industries;
- Caps and hollow bodies for containers of all kinds;
- Bags and covers;
- Among others...;

The Group of companies led by Emmanuel Wafo currently employs more than 250 Cameroonians.

The CEO of MIT CHIMIE is also a member of GICAM since 2005, over 18 years today. Between 2014 and 2016, he was a member of the Executive Board and Chairman of the Local Industry Protection Commission. And, since 2019, he has been Chairman of the Economy and Business Development Commission within the august Cameroonian employers' organization.

Emmanuel Wafo is 55 years old and married with 03 children.
